PROFESSIONAL SUMMARY

Final-year Computer Science and Engineering student (graduating 2027) seeking an Associate Frontend Developer role. Built responsive, user-facing web applications with React.js, JavaScript (ES6+), HTML5, and CSS3, and integrated them with RESTful APIs for live data, forms, and validation. Delivered three complete projects, including a React dashboard and a voice- and text-enabled interface using the browser Web Speech API in English and Tamil. Backed by Core Java, SQL, and MySQL fundamentals and 900+ coding challenges solved on Hacker Rank, with a focus on writing clean, maintainable, user-friendly interfaces.

TECHNICAL SKILLS

Frontend Development: React.js, JavaScript (ES6+), HTML5, CSS3, Responsive Web Design, Component-Based Development, Web Speech API

API Integration & Data Handling: REST APIs, JSON, Asynchronous JavaScript, HTTP Methods and Status Codes, Client-Server Communication, Form Validation

Tools: Git, GitHub, VS Code

Backend & Database (Supporting): Java (Core Java, OOP, Collections Framework, Exception Handling), SQL, MySQL, Relational Schema Design, MVC Architecture, CRUD Operations

Other: Data Structures and Algorithms, Prompt Engineering

PROJECTS

Vehicle Pre-Booking & Fleet Management System
Technologies: HTML5, CSS3, JavaScript, REST APIs, MySQL

- Built responsive web interfaces for browsing vehicle inventory, viewing availability, and selecting reservation time slots.
- Connected booking forms to backend REST endpoints to run live availability checks and show instant booking confirmations.
- Added server-side validation to prevent double-booking, supported by a normalized MySQL schema and full CRUD operations.

Revenue Recovery Web Application (Recover AI)
Technologies: React.js, JavaScript, REST APIs, MySQL

- Built a React dashboard to display and track transaction recovery records using data from backend RESTful endpoints.
- Implemented business logic and data validation rules to flag disputed records and generate suggested recovery steps.
- Fed dashboard metrics with efficient queries over relational MySQL tables that maintain transaction integrity.

Voice-Assisted Health Information Portal
Technologies: JavaScript, HTML5, CSS3, Web Speech API, REST APIs

- Built a responsive web interface that accepts voice and text input in English and Tamil using the browser Web Speech API.
- Integrated the interface with backend REST API endpoints that process search queries and return structured health reference content.
- Logged user queries to a backend database to track search frequency and performance.

CERTIFICATIONS

- Applied Generative AI Specialization – Simplilearn (Prompt Engineering, AI-Assisted Workflows)

ACHIEVEMENTS

- Hacker Rank: Solved 900+ algorithmic and data structure problems (14,451+ Hackos), focusing on arrays, strings, searching, sorting, and efficient implementations.

EDUCATION

B.E. in Computer Science and Engineering
K. Ramakrishnan College of Technology, Tiruchirappalli | Expected Graduation: 2027 | CGPA: 7.53/10
